

Steps to Host a Train Reservation System on InfinityFree :

1- We create a project

Your Accounts

Search domain...

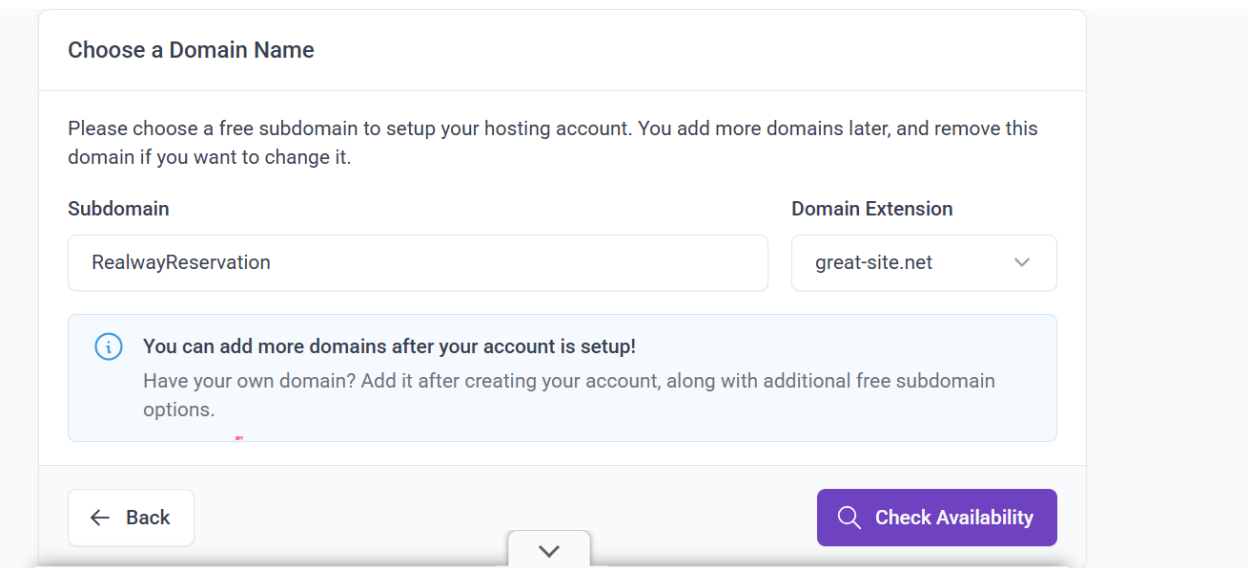

Active Accounts: 1 / 3

if0_41738776 Website for Refa3y.great-site.net [→ Manage](#)

→ refa3y.great-site.net [+ Add Domain](#)

[+ Add Domain](#)

2- Choose a domain name

Choose a Domain Name

Please choose a free subdomain to setup your hosting account. You add more domains later, and remove this domain if you want to change it.

Subdomain Domain Extension

RealwayReservation great-site.net

i You can add more domains after your account is setup!
Have your own domain? Add it after creating your account, along with additional free subdomain options.

[← Back](#) [Check Availability](#)

3- Set additional information

The screenshot shows a web browser window with the URL `dash.infinityfree.com/accounts/create/free`. The page is titled "Additional Information" and contains several form fields:

- Account Label:** A text input field containing "RealwayReservation.great-site.net". Below it is a short description: "A short description to help you identify the account."
- Account Username:** A text input field containing "(generated automatically)". Below it is a note: "Used to login to FTP, MySQL, etc."
- Account Password:** A password input field with a strength indicator. Below it is a note: "A unique password, between 8 and 15 characters, letters and numbers only."
- Email Consent:** A checkbox labeled "I Approve". Below it is a note: "Is our supplier allowed to contact you about your hosting account?"

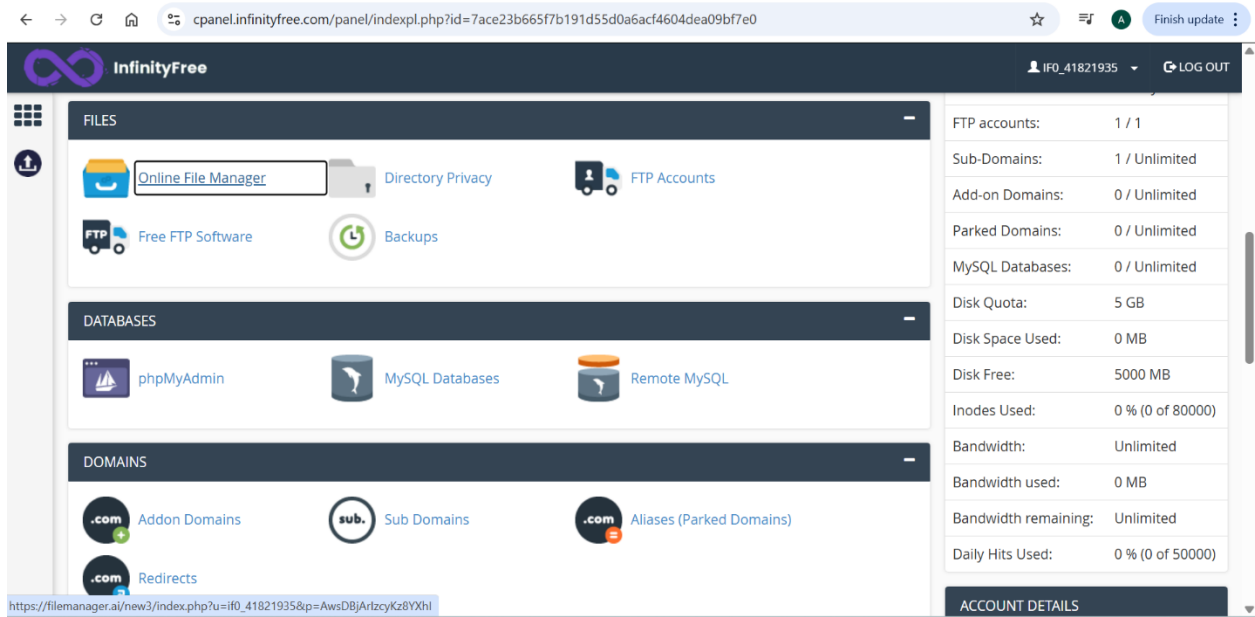

At the bottom of the form, there are two buttons: a "Back" button and a "Create Account" button.

4- Then we choose control panel

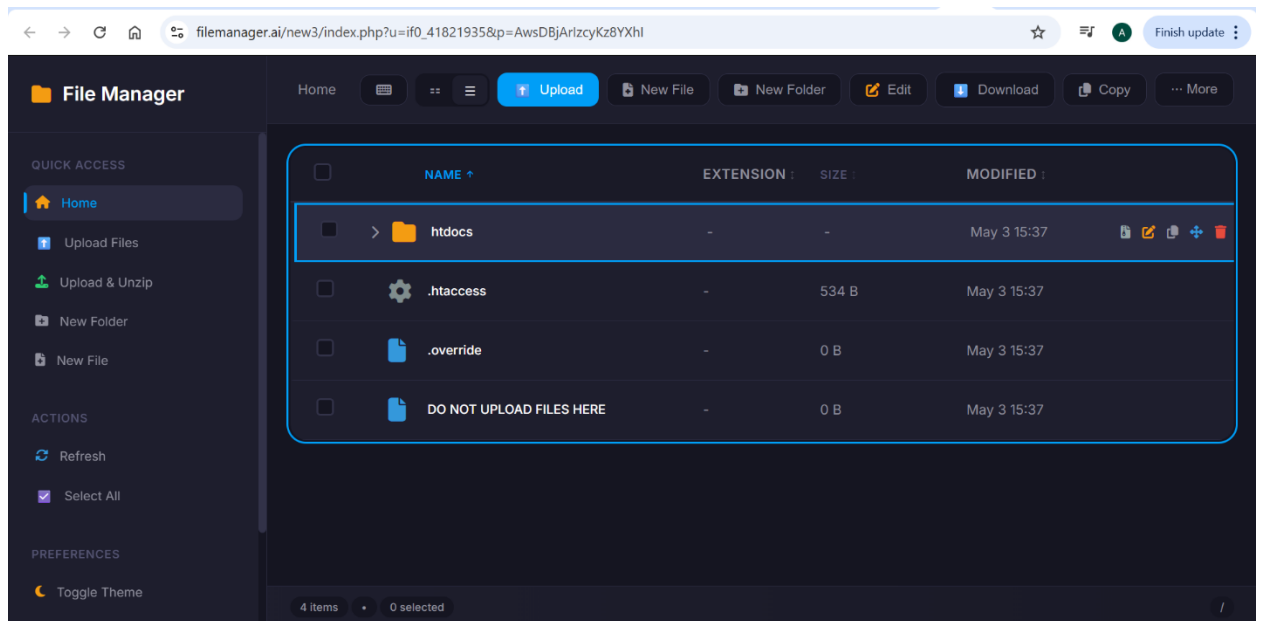

The screenshot shows the InfinityFree dashboard for a user with the email `a.refaey.123@gmail.com`. The dashboard has a navigation bar with links: Home, Profile, Hosting Accounts, Domains, SSL Certificates, Website Builder, and Help. The main content area is titled "ACCOUNTS / IF0_41821935" and "if0_41821935 (RealwayReservation.great-site.net)". Below this, there are several buttons: "Discover more", "Email & Messaging", "Email", "Web Design & Development", and "Development Tools". A warning message states: "It can take up to 72 hours for new domains to be accessible everywhere! This is caused by DNS caching, which InfinityFree cannot control, but there are some workarounds you can try. [Learn more.](#)".

Under the heading "MANAGE IF0_41821935", there is a sidebar with three options: "Overview", "Control Panel", and "File Manager". The "Control Panel" option is highlighted with a blue box. To the right of the sidebar, there are three main sections: "Website Builder", "Script Installer", and "File Manager". Below these, there is a "Domains" section with a search bar and a table with columns "DOMAIN" and "ACTIONS".

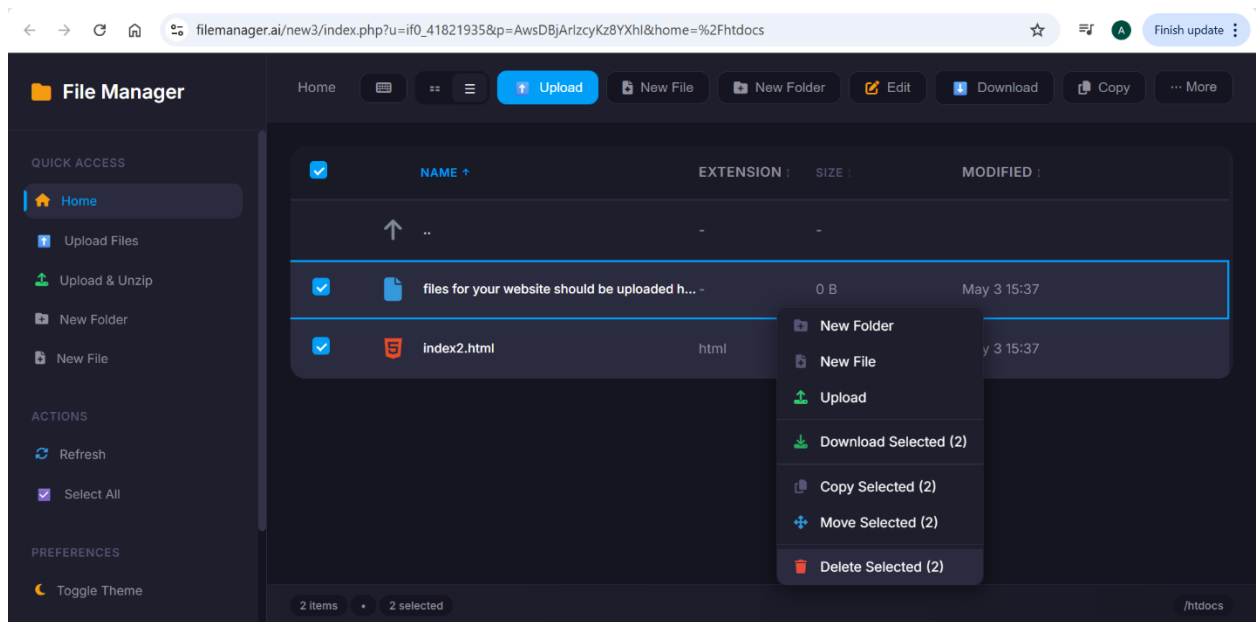

5- Then we choose Online File Manager from files section

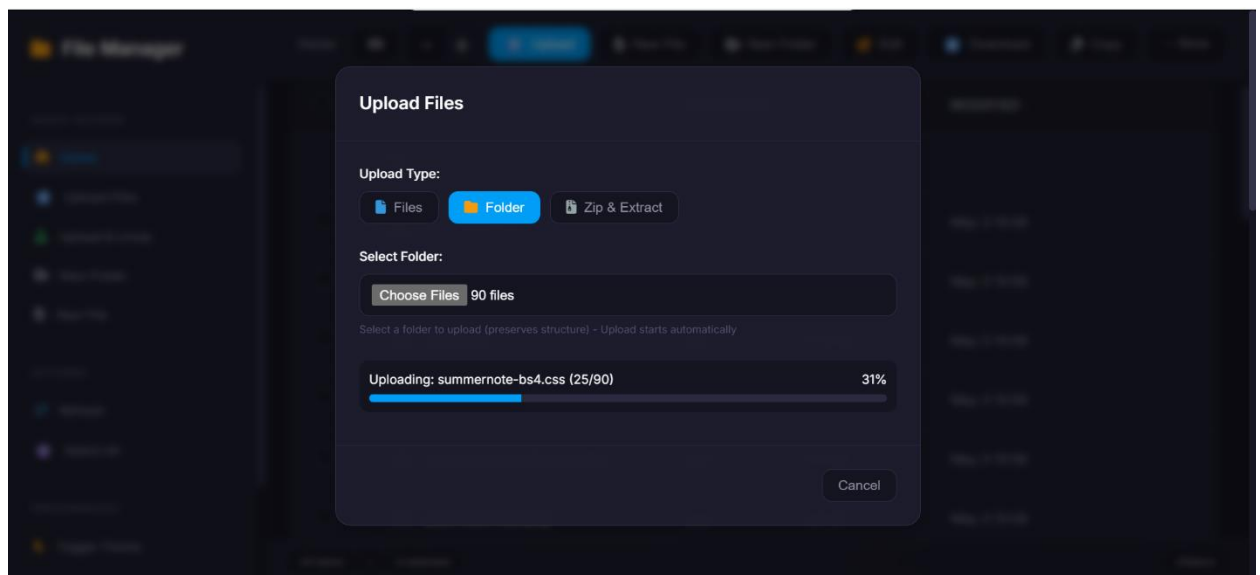

6- Then we enter htdocs

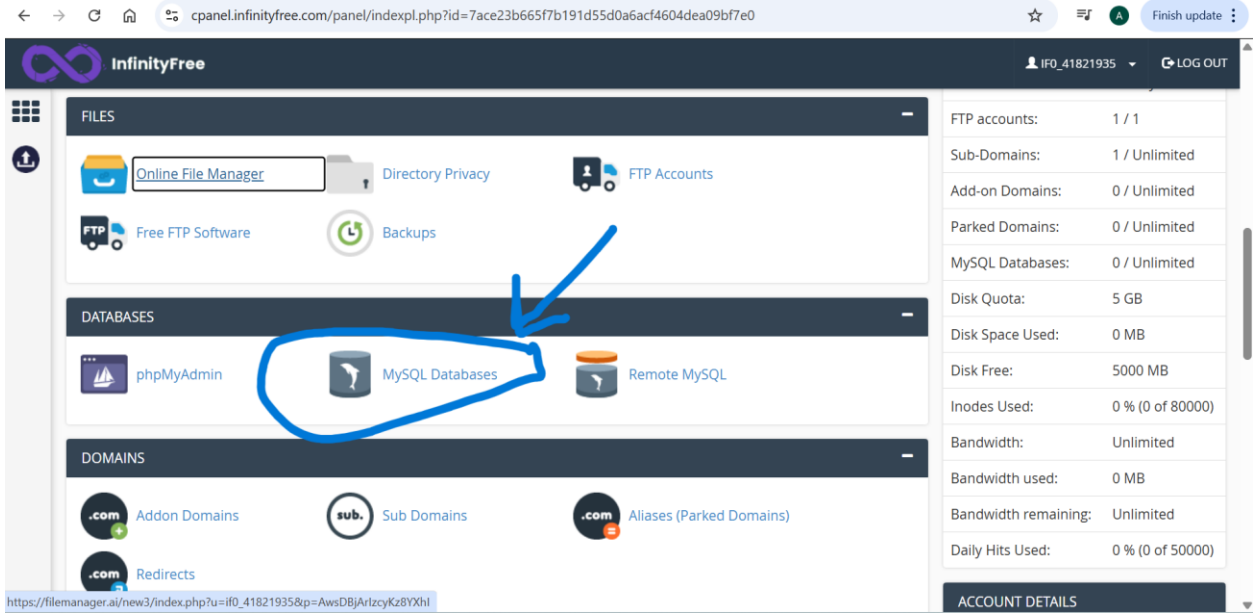

7- Delete all files and folders in it

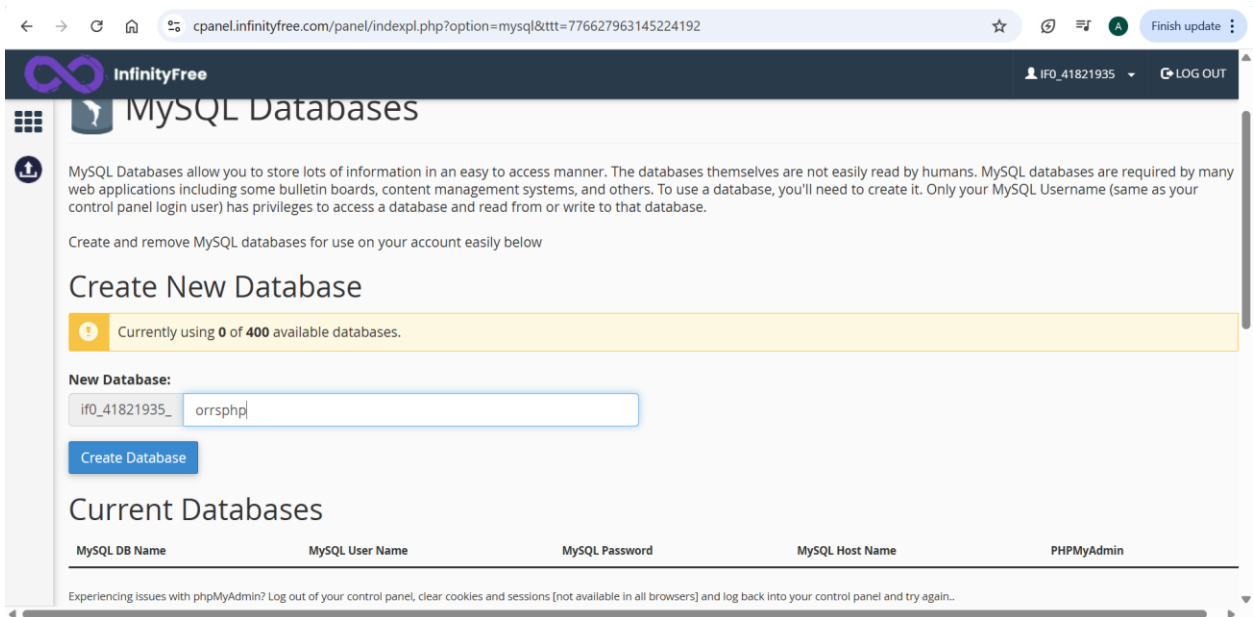

8- Then upload your system's files and folders

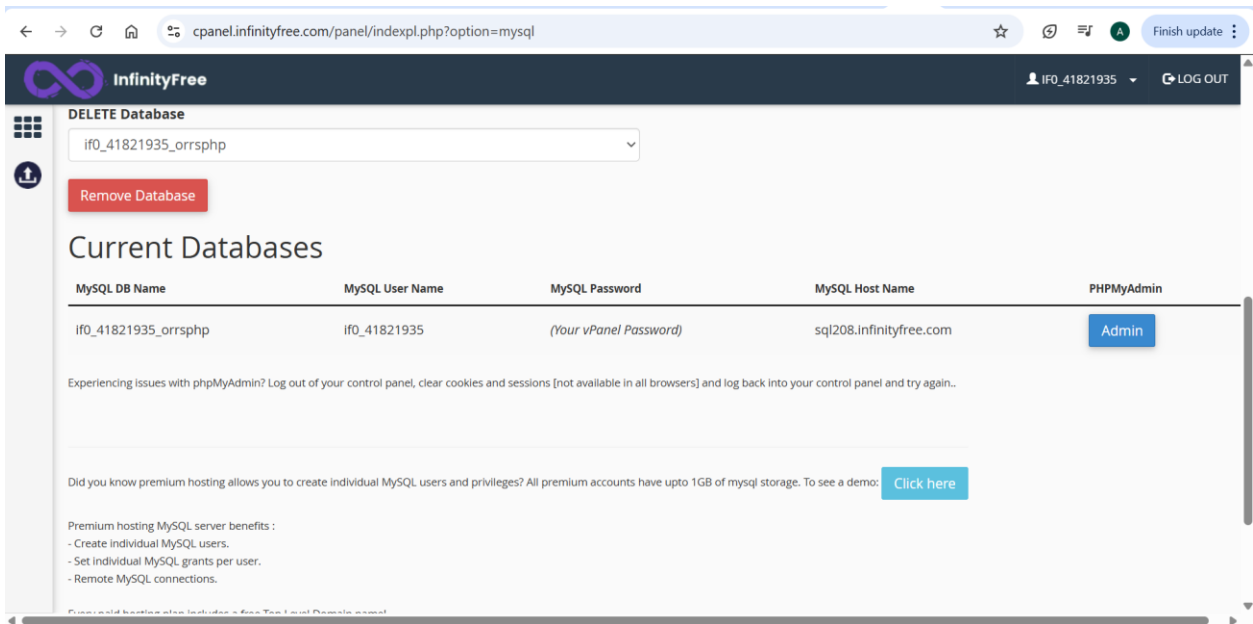

9- Then we return to control panel again then from databases select mysql database

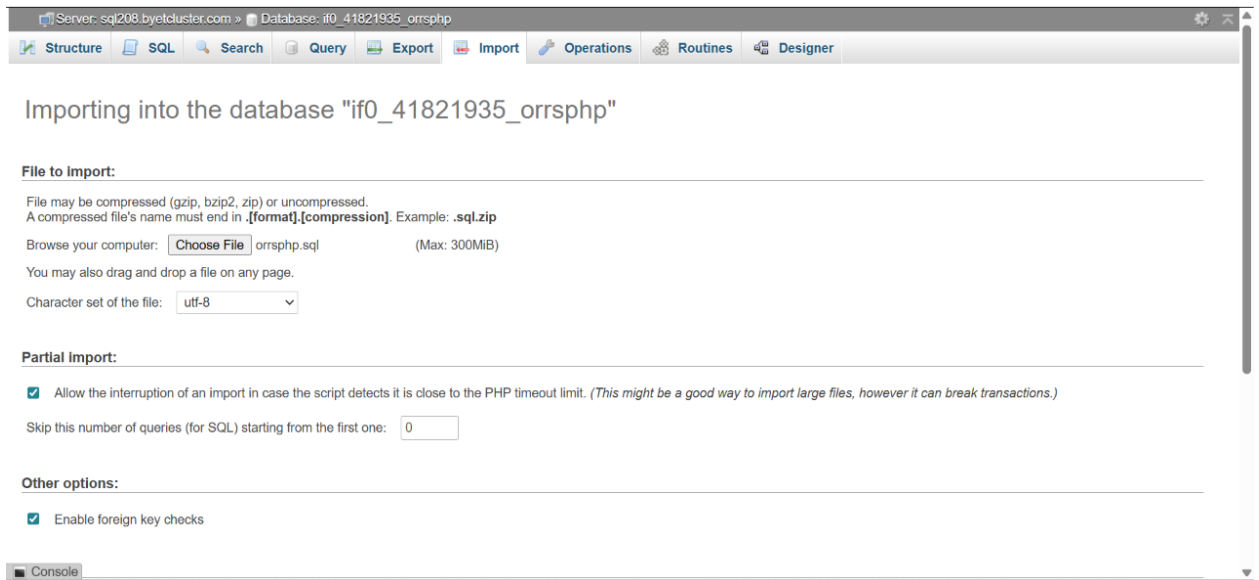

10- Then we add a name of database then create it

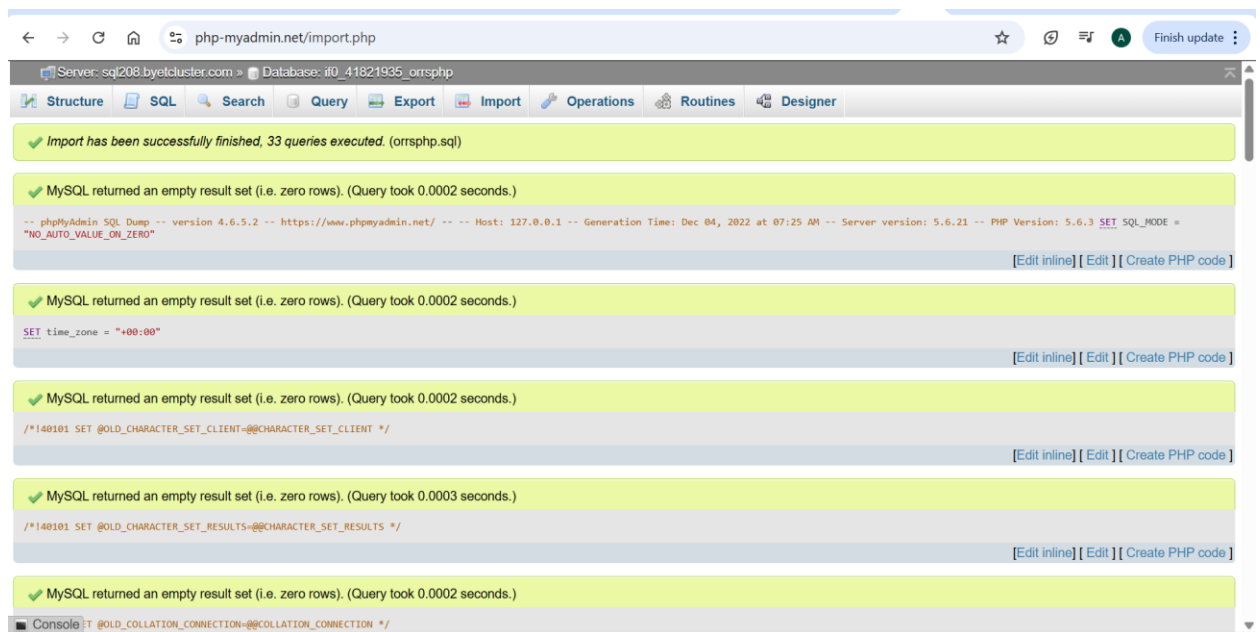

11- So this the database info

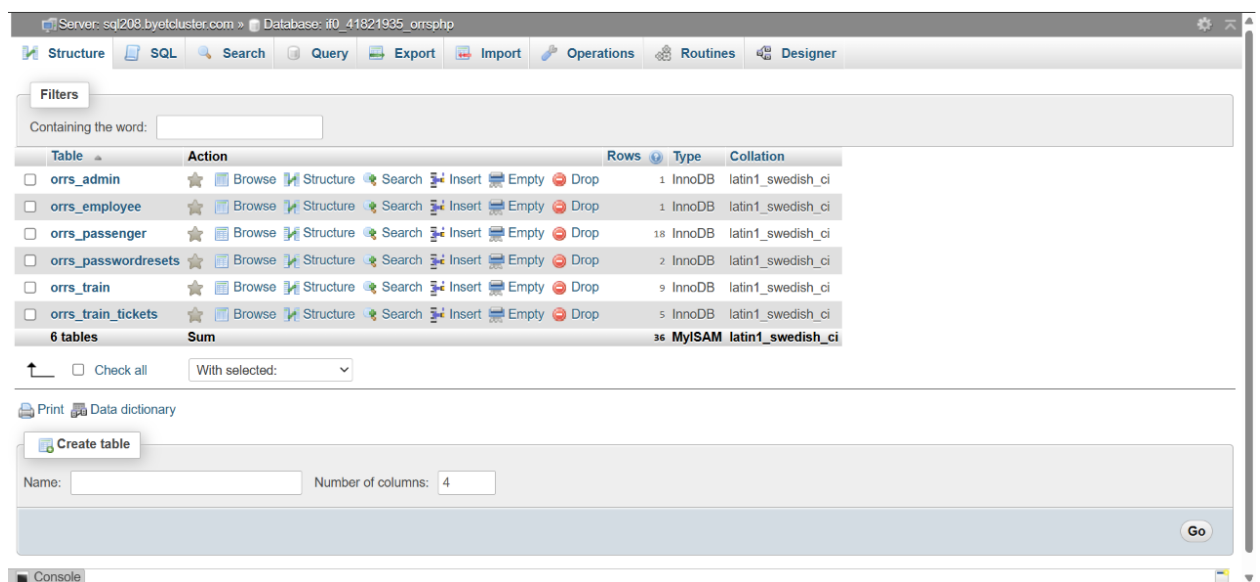

12- Then we choose admin then import our database

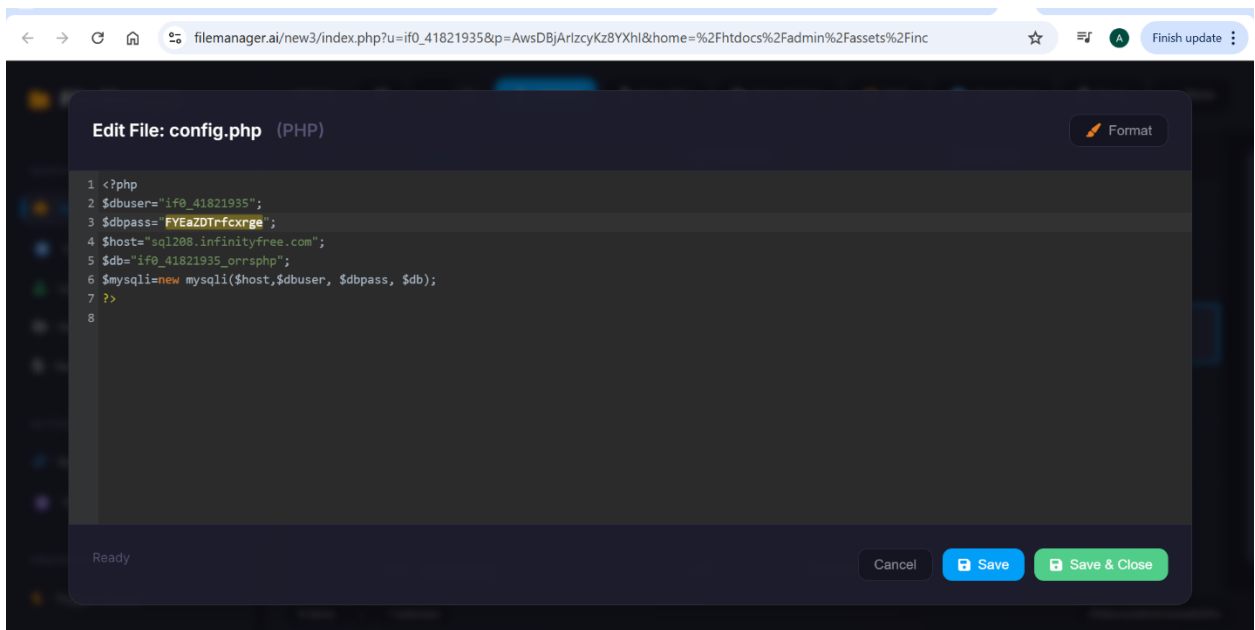

13- Import succeeded

So this is our database

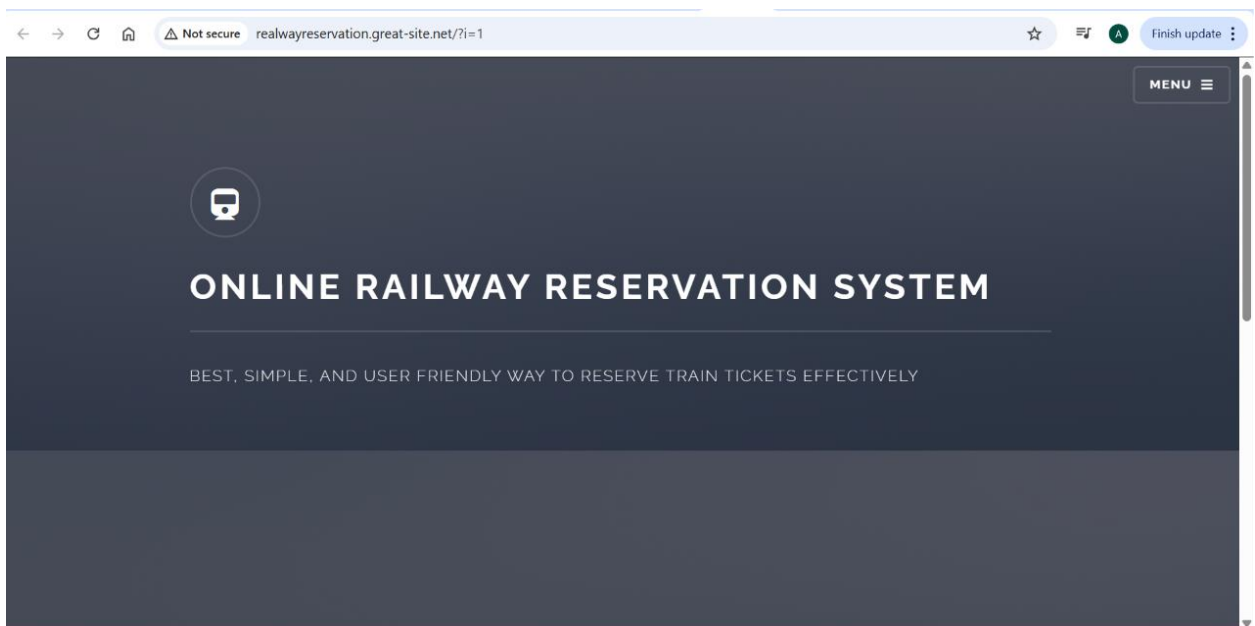

14- Then we return to control panel/online file manager/htdocs then set configurations in `config.php`

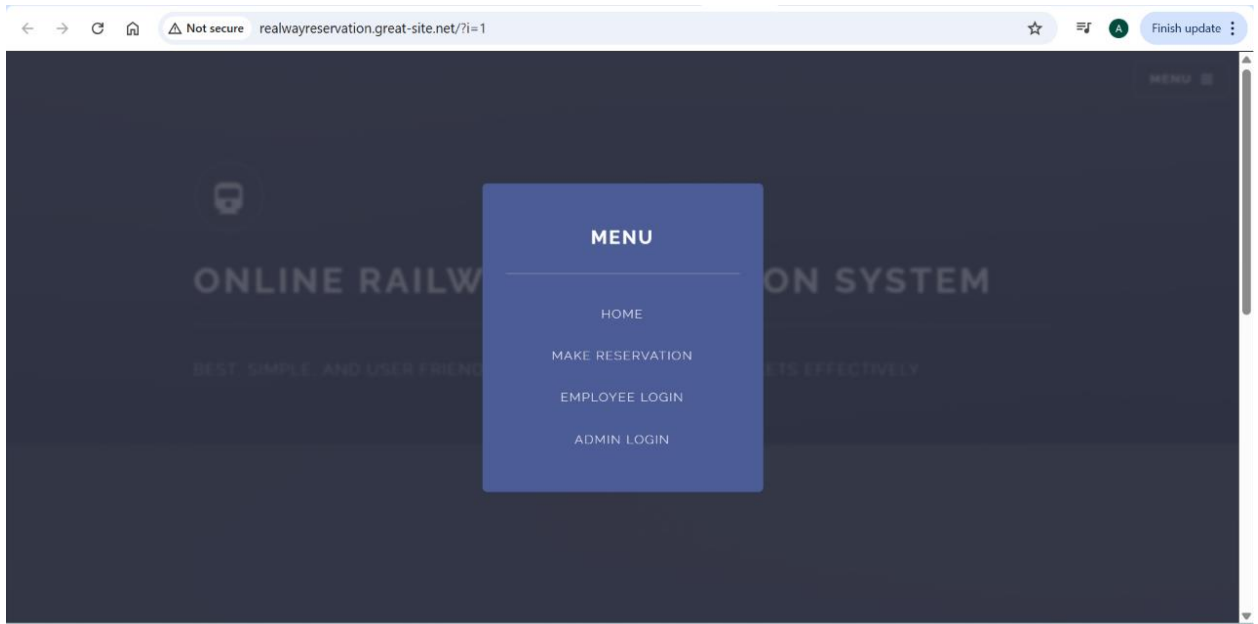

Now the system works successfully lets try it !!!
